

Conclusion

Next Steps

In the coming months, a series of community workshops will be conducted, focusing on the above vision themes and the community input collected to date. The workshops will be an opportunity to explore these themes in greater detail and to launch “strategy teams” of community members. These strategy teams will educate themselves and each other, work together in the upcoming workshops, and work together on an ad hoc basis to fully explore, prioritize, and develop “action plans” for each of the six Vision Themes. These action plans will identify short, medium and long-range actions that could or should be taken to achieve the vision within each thematic area. It is anticipated that the information collected to date, as summarized in the Strategic Planning Framework, will be expanded, refined and prioritized as more information and input is added to the process.

In addition, all of the strategy teams will meet together as a single group to engage in a comprehensive review of all of the draft action plans. The purpose will be to further prioritize the strategies, to eliminate duplication, to address inconsistencies, to define cross-over issues, and to decide how to resolve concerns around which we cannot develop consensus. With these refinements, the action plans will be combined into a single Thirty-Year Comprehensive Strategic Plan for Laguna Beach, a document that will be presented to the City Council and the community for discussion, adoption, and implementation.
