

# CITY OF LAGUNA BEACH

## 5 YEAR LONG-TERM FINANCIAL ASSESSMENT

---

MARCH 6, 2017

## LONG-TERM FINANCIAL ASSESSMENT

### PURPOSE

---

- ✓ Prepare five year forecast of revenue and expenditures as a tool for financial sustainability.
- ✓ Should compliment other planning processes that the City uses such as strategic planning, capital improvement planning, and budgeting.
- ✓ Helps to identify significant future expenses, liability, problems and resources that are not included or recognized in the two-year budget (like the long-term impact of pension costs).
- ✓ Forecast is not a budget and a projected budget gap (shortfall) is not the same thing as a budget deficit.
- ✓ A budget gap can be eliminated through strategies that will achieve long-term sustainability to City's services, meet capital improvement objectives and address other financial challenges.
- ✓ First Financial Assessment and presentation, incorporate additional items in the future based on City Council feedback.

## LONG-TERM FINANCIAL ASSESSMENT

### LONG TERM PLANNING STEPS ALREADY BEING DONE

---

- ✓ Fiscal Policies
  - 20% General Fund Reserve
  - Disaster Fund
  - Strategy to reduce unfunded liability
- ✓ Six month budget reviews
- ✓ Two-year budget
- ✓ Ten year capital improvement program
- ✓ Ten year sewer financial plan

### GENERAL FUND FORECAST 5 YEARS, FY 2017-18 THROUGH 2021-22

#### REVENUE ASSUMPTIONS

- Property taxes = 3.0%-4.5%
- Sales taxes = 2%
- TOT taxes = 4%
- Community Development Fees = Flat
- No tax or fee increases
- Does not assume recession
- Overall, GF revenues growth = 3.1% year

#### EXPENDITURES ASSUMPTIONS

- No new positions
- Salaries and benefits = 3% forward
- Includes CalPERS change in discount rate
- Healthcare = 12% a year
- Maintenance and Operations = 1.5%
- Special Programs (BID matches TOT) 1.5%
- Increase Insurance by \$200,000 annually
- Overall, GF expenditure growth = 4.0% year

### RESERVES

---

#### GENERAL FUND

**20%**  
**(\$11.5M)**

- Inline with similar agencies
- Provides for major decline in revenue coverage, natural disasters and catastrophic events
- Provides a minimum of 3 months' operating expenses (16.7%)

#### DISASTER CONTINGENCY

**10% GF**  
**(\$6M)**

- Exclusively for emergencies
- Equal to 10% of General Fund Operating Expenditures
- Must be repaid in 3 years if borrowed

#### VEHICLE REPLACEMENT

**\$5.9M**

- Maintained for replacement of vehicles
- Funded by charge back to General Fund of roughly \$1.5 annually
- Fully funded based on current assumptions (vehicle useful life)

#### INSURANCE

**\$6.0M**

- General Liability and Workers' Compensations for City Self Insurance retention levels
- Claims
- Reserve for employee vacation and sick leave balances (payouts at separation)
- Funding for City Medical Plan

### ANOTHER RECESSION IS INEVITABLE

Source: Bureau of Labor Statistics, National Bureau of Economic Research

- Since 1927, 13 recessions have occurred on average every 6.8 years; Now 7 years since “official” end of Great Recession
- Last recession, General Fund revenues decrease \$1.2 million over 12 months, roughly 2 years to recover

Source:

**PENSION**

FORECAST

PENSION

RECOMMENDATION

## BACKGROUND CALPERS

- City has contracted with CalPERS since 1945
- Approximately 245 active and 362 retired employees in CalPERS system
- The City has five retirement plans with CalPERS
  - 2% at 62 (PEPRA), 2.5% at 55, 2.7% at 57 (PEPRA), 3% at 55 and 3% at 50
- Employees earn a retirement allowance (defined benefit) based on
  - Years of Service
  - Final Compensation
  - Age at Retirement
- City and employees share in the normal cost (annual cost of service)
- Unfunded liability occurs when projected benefits payable to members exceed the projected funds available to pay those benefits (\$52M)
- Cost to leave is over \$460M and is financially prohibitive.
- Not being a member of CalPERS is at a competitive disadvantage to recruit and retain employees.

RECOMMENDATION

## CALPERS PLAN

- CalPERS is working to reach 100% funded in 30 years
- Higher contributions short-term
- Lower contributions long-term
- Recently lowered expected investment rate of return from 7.5% to 7.0%
- Will continue to lower discount rates if investment returns are good. For example, a 20% investment return would lower the assumed rate by 20 basis points.
- Better Funded Status

Every dollar paid  
to CalPERS retirees  
comes from  
three sources:

65¢ Investment earnings

22¢ CalPERS employers

13¢ CalPERS members

### CITY STRATEGY ACCELERATED FUNDING

- Additional discretionary payments above required amount
- Have paid \$6.4 million to date over required amount
- Additional payments were expected to continue through FY 2021-22
- Payments made **only** benefit City Plans
- Projected to save City \$21 million over 30 years
- Strategy assumed:
  - CalPERS earnings would average 7.5% over 30 years.
  - No changes in CalPERS assumptions
- Each \$1 million payment is estimated to save \$1.7 million over 30 years

HISTORY

### ADDITIONAL INFORMATION

---

- Payments made by the City benefit only the City (Confirmed by CalPERS).
- Involuntary Terminations are agencies that can't or refuse to make payments (e.g. bankruptcy)
  - Takes between 8-17 months
  - Termination liability prepared by CalPERS staff
  - If not making payments, CalPERS Board reviews to reduce benefits (liabilities) to available assets
  - Assets are moved from current plan (e.g. pooled plans) to a Terminated Agency Pool (TAP)
  - Benefits are paid from TAP
- Why San Bernardino didn't cut pensions during Bankruptcy (Source: CalPensions article)
  - Lead to exodus of City employees.
  - Impair future recruitment of new employees due to the noncompetitive compensation packages. This is particularly true for safety positions.

## IMPACT OF DISCOUNT RATE CHANGES ON CONTRIBUTIONS

---

### Three Components to Discount Rate Impact

1. Permanent Increase in Normal Cost
    - Shared by PEPRA members (possibly Classic members in the future)
  2. Additional UAL payments toward increases in accrued liability
    - 20-year payment periods
  3. Decreases to UAL payments toward existing layers of UAL
    - CalPERS will be charging less interest on prior bases
- Total discount rate impact = 1. + 2. - 3.

PENSION

RECOMMENDATION

### BENEFITS OF REDUCING DISCOUNT RATE

- Strengthens long-term sustainability of the fund to pay promised benefits
- Reduces negative cash flow; additional contributions will help to offset growing pension payments
- Reduces the long-term chances of falling below an undesirable funding level
- Lower expected future investment losses leading to more stable required contributions

### OTHER CONSEQUENCES

- Required contributions from employers and members will increase
- Plan funded ratios will drop near-term
- Pension Expense under GASB 68 will increase
- Net Pension Liability under GASB 68 will increase near-term

HISTORY

**IMPACT DISCOUNT RATE**

STRATEGIES

FORECAST

PENSION

RECOMMENDATION

## POSSIBLE PENSION STRATEGIES

.....

1. Phase in future pension increase as soon as possible, use difference between required payment and budgeted payment to pay down unfunded liability (current strategy).
2. For the next five year use 1/3 to 1/2 of mid-year savings toward unfunded pension liability, re-evaluate at end of five years.
3. Reprogram Side Fund Loan repayment (\$857,000 a year), need to analyze.
4. If feasible, use existing cash:
  - Lower General Fund Reserve requirement, use cash toward payment
  - Use Insurance or Vehicle Replacement reserves repaid with future pension cost savings (side fund approach)
  - Disaster Contingency Fund, temporarily replace with Bank Line of Credit, repaid with cost savings
  - Parking Fund contribution of \$1 million a year for 5 years, repaid with future savings

HISTORY

IMPACT DISCOUNT RATE

STRATEGIES

FORECAST

PENSION

RECOMMENDATION

## POSSIBLE PENSION STRATEGIES

.....

4. Alternative to paying CalPERS is payments to a Section 115 Trust
  - Can only be used to pay pension obligations
  - Investment strategy tailored to City's risk tolerance
  - Pay pension cost in a given year free up funds for other obligations
5. Bring back a recommendation as part of the two year budget

HISTORY

IMPACT DISCOUNT RATE

STRATEGIES

FORECAST

PENSION

RECOMMENDATION

## PENSION STRATEGIES NOT RECOMMENDED

---

1. Pension Obligations Bonds (POB): In 2015, Government Finance Officers Association issued an advisory recommending state and local governments ***do not*** issue pension obligation bonds and listing 5 reasons including:
  1. The investing POB proceeds might fail to earn more than the interest rate owed on the term of the bonds, leading to increasing overall liabilities
  2. POBs are complex instruments carrying considerable risk
  3. Issuing taxable debt increases bonded debt burden and potentially uses up debt capacity
  4. POBs are frequently structure in a manner that defers principal payments or extends repayment period
  5. Rating agencies may not view issuance of POBs as credit positive
2. Alternative pension plans; currently require terminating contact with CalPERS at a cost of \$460 million.

# RECOMMENDATIONS

FORECAST

PENSION

RECOMMENDATION

## RECOMMENDATIONS

---

It is recommended that the City Council approve the following policies to help guide the City Manager and staff in preparing and managing future budgets.

1. Phase in future pension increases as soon as possible, use the difference between required payments and future budgeted payments to pay down unfunded liability (similar to the current strategy);
2. For the next five years use one-third (1/3) to one-half (1/2) of mid-year savings to pay down the unfunded pension liability, re-evaluate at the end of five years;
3. As part of the budget in May, return with additional strategies to address pension unfunded liabilities;
4. Rely on Community Assistance Grants to provide assistance to non-profits with the assumption that grants outside of that process should not be anticipated;

FORECAST

PENSION

RECOMMENDATION

## RECOMMENDATIONS

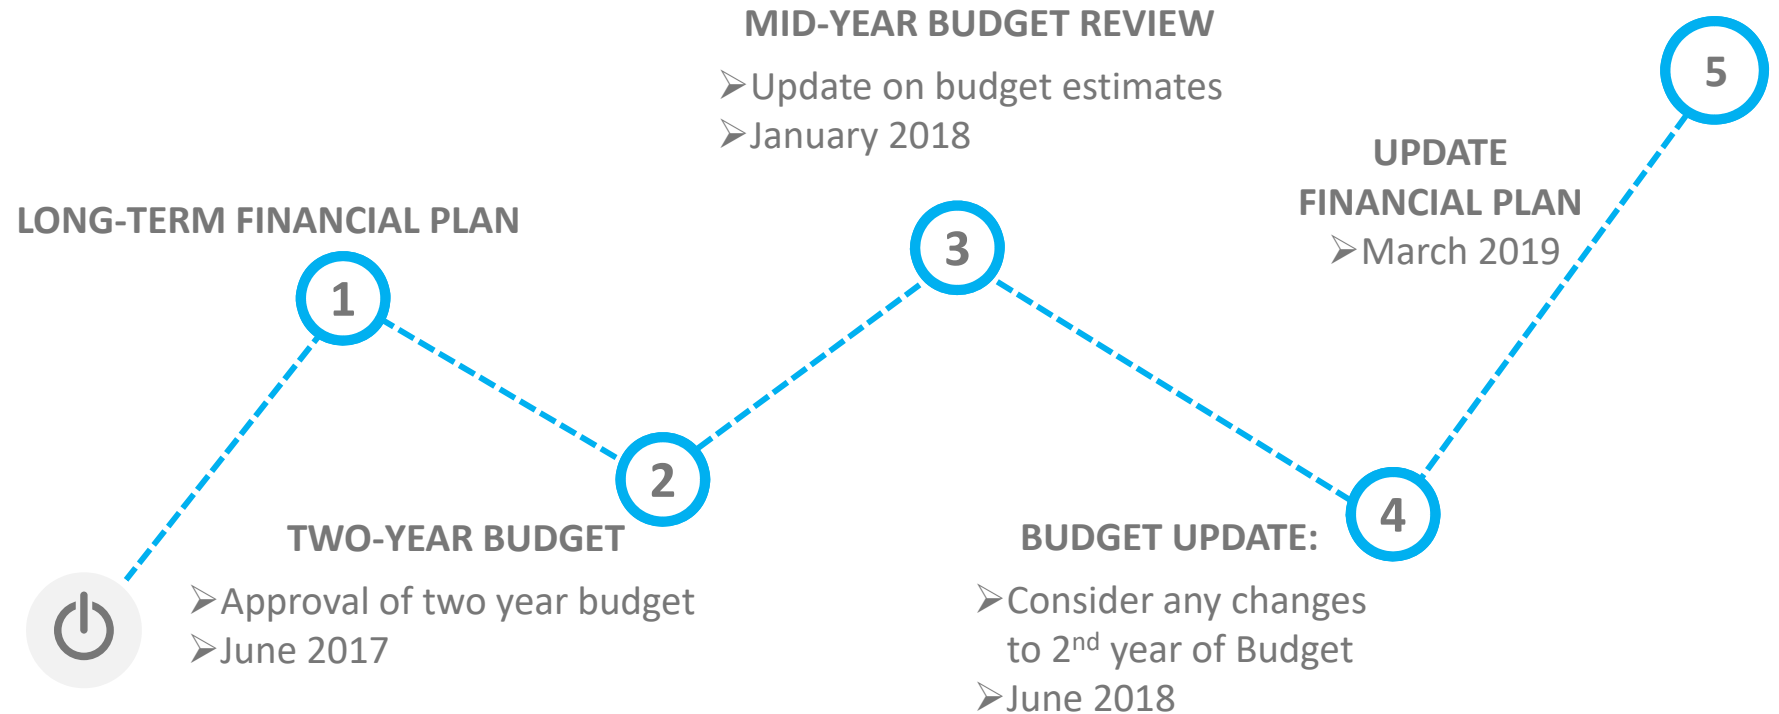

---

5. Identify capital projects for which the City Council may be willing to use debt financing or determine to postpone them for five years and direct the City Manager to report back on those items;
6. Incorporate operating and maintenance forecasts for new facilities in capital improvement project planning;
7. Review city fees every four years to keep pace with inflation and account for changes in services;
8. Consider establishing an Information Technology reserve for the replacement and repair of critical IT infrastructure;
9. Update Five-Year Financial Assessment prior to the start of the two-year budget process;
10. Incorporate items in future Five-Year Financial Assessment presentations based on feedback from the City Council.
