

Are there **FROG**s in your sewer lateral?

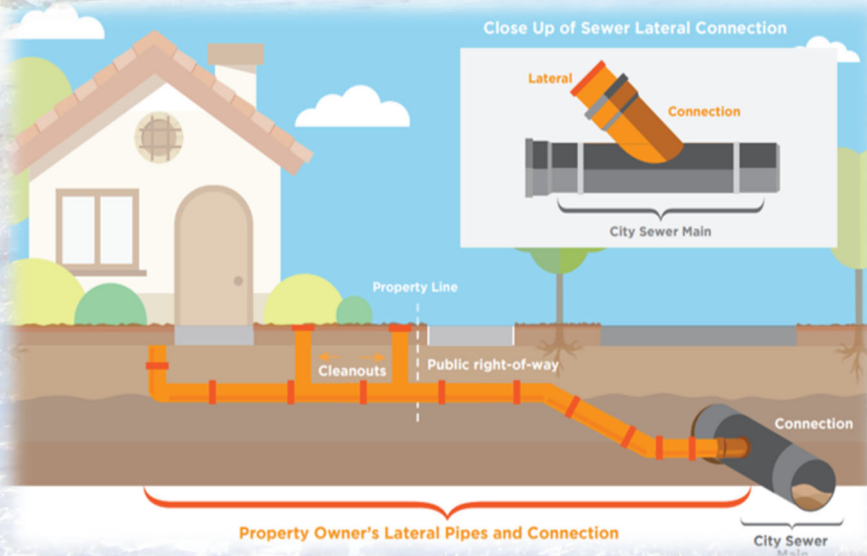

Fats, **R**oots, **O**il & **G**rease!

FROGs are found in every sewer line, including your private sewer lateral. FROGs will block pipes causing sewage to back up and overflow into private properties, streets, down storm drains, and into the ocean.

What **YOU** can do to help keep our system **FROG-free**:

- Have your sewer lateral periodically inspected by a licensed plumber to make sure it's clean and crack-free.
- Don't put fats, oils or grease down the drain.
- Don't plant trees over your sewer lateral.

***FROGs** are the #1 cause of sewage spills!*

Not sure what a private sewer lateral is? Every homeowner has one! It is the pipe that connects your plumbing to the City's sewer main. Here in Laguna Beach, it is the homeowners responsibility to maintain the sewer lateral all the way to the City's main.

Please help us keep our beaches clean!
